

Report of the Joint Committee on Community College Equivalencies

Introduction

In a memorandum of understanding as part of the 2009-2015 collective bargaining agreement between the University of Hawai'i Professional Assembly (UHPA) and the Board of Regents of the University of Hawai'i (UH), the parties agreed to meet to review the various equivalencies to the semester credit hour standards, set forth in BOR Policy 9-16 (revised), being applied to other modes of instruction and non-instructional activities and duties carried out by the faculty members at the community college campuses.

The parties were charged with evaluating whether the current equivalencies being applied to the credit hour standards reflect the duties and responsibilities of the workload to which they are being applied. This would include, but not be limited to, clock-hour equivalencies used for determining the contact hour assignments in:

- i. clinical instruction in the health field related curricula, e.g. nursing and applied health
- ii. laboratory instruction in the sciences
- iii. vocational programs

The parties were also charged to review distribution of other teaching equivalencies that result in the release of instructional faculty from other assignments on each of the campuses. This would include the number of credit hours of instruction reduced as a result of other assignments, including, but not limited to:

- i. faculty governance
- ii. division and departmental administrative duties
- iii. curriculum development and evaluation
- iv. compliance with accreditation standards and reporting

Membership of the Joint Committee included:

NAME	TITLE	CAMPUS/ORGANIZATION
Leticia Colmenares	Associate Professor, CC	Windward CC
James De Ste Croix	Professor, CC	Leeward CC
James Dire	Vice Chancellor	Kauai CC
Richard Fulton	Vice Chancellor	Windward CC
Erika Lacro	Vice Chancellor	Honolulu CC
Benjamin Marquez	Assistant Professor, CC	Maui College

John McKee	Vice Chancellor	Maui College
JN Musto	Executive Director	UHPA
Joni Onishi	Vice Chancellor	Hawaii CC
Derek Oshiro	Associate Professor, CC	Honolulu CC
Louise Pagotto	Vice Chancellor	Kapiolani CC
Michael Pecsok	Vice Chancellor	Leeward CC
Joel Peralto	Professor, CC	Hawaii CC
Richard Randolph	Associate Professor, CC	Kauai CC
Sharon Rowe	Professor, CC	Kapiolani CC

The Joint Committee met on seven occasions over eighteen months. Analysis and discussion included review of the previous community college teaching equivalency policy (CCCM #2550), the current teaching equivalency practices among the campuses, the accuracy of data related to credit and contact hours within the schedule of classes, and the issues of equity and consistency in both credit/contact hour equivalencies and non-instructional equivalencies.

This report presents the findings of this Joint Committee and recommended changes to the community college teaching equivalency policy.

Codification of Current Practice

CCCM #2250 established the following guidelines for credit and contact hour teaching based on the previous 30 SCH/yr standard teaching assignment that was established by the University of Hawaii Board of Regents. Faculty teaching science, business or basic academic skills classes which require a combination of lectures and laboratory exercises, 18 weekly class contact hours per semester was considered equivalent to the 30 SCH/yr standard teaching assignment. Faculty teaching classes in technical/occupational programs, studio art and health and physical education, and/or basic academic skills classes which require a different combination of lectures and laboratory or shop activities, 23-25 weekly class contact hours per semester was considered equivalent to the 30 SC/yr standard teaching assignment.

After review of current practice, the Joint Committee found that the credit/contact hour equivalencies described in CCCM #2250 were the basis for faculty teaching assignments at all campuses with the exception of art studio classes. While the CCCM #2250 describes the contact hour equivalency as being 23 to 25 contact hours, actual practice in art studio classes varied from 18 to 21 contact hours.

Attachment A (appended at the end of report) displays the annual credit hour and contact hour teaching assignments for all faculty in 2010-2011 as well as the contact hour basis for the assignment. Faculty with credit or contact hours in excess of their teaching equivalency basis have either banked the excess equivalencies for use in the following year or been paid a salary overload. Faculty with credit or contact hours less

than their teaching equivalency basis received non-instructional equivalencies for other assignments.

Review of the patterns of non-instructional assignments and their equivalencies revealed significant variations among campuses both in terms of the assignment for which an equivalency was granted and the amount of equivalency for specific activities. Some differences are to be expected among the campuses since staffing levels and scope of work both vary based on the uniqueness of campus curricular offerings.

Attachment B (appended at the end of report) displays the non-instructional assignments by faculty member for 2010-2011 and the teaching equivalency granted for that assignment.

In its review and codification of current practice, the Joint Committee noted that

- i. There is currently no easily accessible report that captures the combined teaching and non-instructional equivalencies for all faculty.
- ii. The schedule of classes database, which might serve as the source for the teaching assignment report, had a significant number of data errors in the contact hours assigned to classes.
- iii. The Banner student software has a module related to faculty workload but that module is not currently used by campuses.
- iv. The modification of BOR policy 9-14 to reflect an annual teaching assignment of 27 semester credit hours (SCH) or equivalent per year makes it difficult to manage teaching equivalencies on a semester basis. For example, what was previously an 18 contact hour per semester load for certain lab sciences becomes a 32.4 contact hour load per year (applying the same ratio to the reduction in teaching assignments from 30 SCH per year to 27 SCH per year or a 10% reduction). If equally divided between two semesters, the semester contact load would be 16.2 contact hours. Similarly, a shop contact hour load that was previously 24 contact hours per semester becomes 43.2 contact hours per year or 21.6 contact hours per semester.
- v. The non-instructional equivalencies have historically been granted in 3 SCH blocks, that is, the equivalent of a 3-credit lecture class. A faculty member is also often described as released from or granted “release time” from teaching one or two courses. The Joint Committee noted that an alternate and perhaps more accurate representation is not that the faculty member is “released” from teaching but instead is assigned a faculty duty with a certain level of SCH equivalency. The Joint Committee also noted that there is no inherent requirement that such equivalencies for non-instructional assignments be in units of three credits but could be any value that accurately reflected the amount of effort associated with the assignment.

Instructional Credit Equivalencies

Instructional credit equivalencies refer to the teaching load associated with courses that are measured in terms of contact hours rather than credit hours attached to the instruction. Typically, a lecture or lecture discussion class grants three credits to students for three hours of face-to-face instruction (actually 3 x 50 minutes or 150 minutes of instruction) over a 15- or 16-week semester. A student may earn fewer credits for more class contact hours in a laboratory or shop class. For example, a student may be in a shop class for 12 hours per week but only earn 4 SCH.

When faculty teaching assignments are based on contact hours there are limits on the number of contact hours per week that constitutes a full load equivalent to 15 SCH. As noted earlier, the previous CCCM #2250 established the instructional credit equivalencies as 18 contact hours per semester for laboratory classes, and 23 to 25 contact hours for faculty in shop and similar classes. In the example, in the previous paragraph the shop teacher teaching two of the shop classes with 12 contact hours each would have a load of 24 contact hours and would be considered to have a full semester teaching load. The credit hour load of the faculty member would be 8 SCH, reflecting the lower number of credits that the students earn from the shop class.

The Joint Committee had several discussions about whether or not the historic ratios of contact to credit hour equivalencies were appropriate or equitable. Some Joint Committee members feel that the amount of faculty work associated with teaching a science laboratory or shop class is similar to or even more labor and time-intensive than that associated with a lecture class. These Joint Committee members feel that there should be no differentiation in the teaching equivalency of a laboratory or shop and a lecture class. Other Joint Committee members feel that there is a difference in the nature of the work when considering both the in-class and out-of-class responsibilities, and the current differentiations are appropriate. Some members of the Joint Committee also raised the question of whether faculty assigned to laboratory or shop classes have extraordinary duties associated with the maintenance of the labs or shops and the ordering or preparation of materials associated with instruction in the shops and laboratories. It was noted that there is variation among the campuses, and even among the disciplines within campuses, in how laboratory and shop classes are supported. Some shops and laboratories have assigned APT personnel, others have student support personnel, others have faculty with non-instructional assignments with responsibility for the shops or laboratories, and others assume that the support duties are inherently part of the teaching assignment.

The discussion relating to faculty assigned art studio classes revealed that all campuses felt that 24 contact hours was too high an instructional credit equivalency, especially if the faculty member has duties relating to the management of the studio. With the

exception of one campus, all faculty members are teaching approximately 21 contact hours of studio art classes.

The Joint Committee noted that there were increasingly other factors affecting the teaching load of faculty that are not fully reflected in the current credit/contact hour framework. Changes in pedagogy such as on-line courses, hybrid courses, open laboratories, field studies and practica, and emporia approaches all reflect environments different from the traditional self-contained classroom. These variations are likely to increase as technology plays a more significant role in supporting teaching and learning. Increasingly, the traditional measures that tie student credits to faculty workload should be reevaluated.

Based on the discussions, the Joint Committee recommends:

- i. A change be made in the policy to establish teaching equivalencies for each course. The equivalency will be based on the following formula: contact hours divided by basis, multiplied by 15 equals the teaching equivalency, where contact hours equals faculty contact hours for the course; basis equals the assigned category of the course (e.g., 15 lecture, 18 lecture lab, 21 studio, and 24 shop); and 15 is the number used to normalize the assigned value of the course. Final total number of teaching equivalencies must reach a total of 27 annually.
- ii. That operational definitions be developed to describe the basis for categories of such terms as lecture, lecture lab, studio, shop, and practicum.
- iii. The Instructional Credit equivalencies should be consistent whether or not a related lecture/laboratory course is taught as a combined class or as a separate lecture and laboratory course.
- iv. Coop and internship courses shall have teaching equivalencies based on the number of students in the course: 5 students equals one teaching equivalency. Similar teaching equivalencies need to be defined for individual, private music instruction.
- v. A faculty member's teaching assignment shall be calculated by adding the instructional credit equivalencies based on the values assigned to each course. The total for the faculty member shall not exceed 27 SCH equivalencies per academic year.
- vi. If the faculty member's teaching equivalencies, including non-instructional equivalencies, exceed 27 SCH equivalencies in a year, the college may either pay overload or carry forward a balance to the next academic year. The college may not carry forward a balance in excess of 3 SCH equivalencies without the faculty member's concurrence.

- vii. The community colleges should create a report that displays and monitors the teaching and the non-instructional equivalencies and total teaching load for each faculty member.

Non-instructional Equivalencies

The workload of community college faculty members, as noted in Article IV of the 2009-2015 Agreement between the University of Hawaii Professional Assembly and the Board of Regents of the University of Hawai'i, and in the Community Colleges Faculty Classification Plan, includes more than the teaching assignments provided to the faculty member. When a faculty member is assigned additional non-instructional duties of sufficient magnitude that the faculty cannot be reasonably expected to carry out those duties within the normal workload, then a non-instructional equivalency may be granted for the additional assignment.

As described in CCCM #2250, non-instructional assignments may be granted for the following categories of duties: Division or Department Chair, Program Coordinator, Discipline Coordinator, Faculty Governance Leadership, Other activities which include, but are not limited to, Major Curriculum Revision, New Program Development, Research and Development in Teaching Pedagogy, Development of Major Grant or Contract Proposal, and Institutional Service.

In reviewing the existing lists and descriptions of non-instructional assignments, the Joint Committee noted that

- i. The duties of the Division/Department Chair need to be updated to reflect the current expectations of the position. Additionally, the matrix that establishes the non-instructional equivalency for the Division/Department Chair needs to be adjusted to better reflect the time and effort associated with the chair position.
- ii. The duties associated with the title Program Coordinator vary considerably between the campuses, as does the amount of non-instructional equivalency granted to the Program Coordinator.
- iii. The duties associated with the title Discipline Coordinator are the least well defined, and not all campuses have established Discipline Coordinators nor was there any consistent awarding of non-instructional equivalencies for discipline coordinators.
- iv. The categories and ranges of non-instructional assignments within CCCM #2250 were intentionally broad to allow colleges to manage and assign work appropriately. The Joint Committee did not feel that it was either possible or desirable to define narrowly or rigidly all of the possible non-instructional assignments and their values. However, should such assignments be made, they should include an instructional credit equivalency based on the scope, work, and time required by the assignment.

The Joint Committee acknowledges that when the maximum teaching assignment was reduced from 30 to 27 credits per year, the intent was to provide faculty with more time to carry out the aspects of their total workload. The categories of non-instructional assignments should reflect unique work, not generally included in the faculty workloads.

The Joint Committee also acknowledges that any faculty member, who believes that his or her non-instructional assignment is not sufficient, he or she may elect to teach in lieu of the non-instructional assignment.

- v. CCCM #2250 had an upper limit on the amount of non-instructional equivalency of 24 credits. The limit does not reflect the reality that a faculty member may receive an assignment in excess of that limit particularly when that assignment is funded through an extramural grant or other similar activity. Therefore, faculty members may be released from all teaching assignments, i.e., granted 27 SCH equivalencies.

Based on the discussion, the Joint Committee recommends the following:

- i. The description of the allowable non-instructional equivalencies should be broadly stated to allow flexibility in assigning faculty work. However, clear criteria should be established and implemented across the campuses.
- ii. A new category of Non-Instructional duties related to the management and support of laboratories, shops, and studios should be created.
- iii. The description of the duties of the Division/Department chair and the related matrix determining the amount of non-instructional equivalency should be revised as shown in Attachment C.
- iv. The description of the duties of the Program Coordinator should be revised as shown in Attachment D. When the workload of the Program Coordinator exceeds the work normally associated with non-instructional workload of a faculty member, then the amount of non-instructional equivalencies will be determined by the campus.
- v. The description of the duties of the Discipline Coordinator should be as shown in Attachment E. When the workload of the Discipline Coordinator exceeds the work normally associated with non-instructional workload of a faculty member, then the amount of non-instructional equivalencies will be determined by the campus.
- vi. The amount of non-instructional teaching equivalencies given to an assignment, which may be in units other than multiples of three, and could result in a fractional number, should be added to the SCH equivalencies of the courses

taught to determine whether or not the faculty member meets the 27 SCH per year equivalency in the BOR policy.

- vii. The report on faculty teaching assignment should be developed to reflect both instructional and non-instructional equivalencies.
- viii. The Board of Regents should consider revising its BORP 9-14 to separate the semester credit hours assigned to courses from the determination of faculty workload. Faculty workload should be based on the actual work related to the teaching and non-teaching aspects of the work being done.

Other Considerations

The Joint Committee acknowledges that the following issues are related to faculty teaching load but are beyond the scope of this report and recommendations. Future discussions may wish to address these considerations.

- i. By Board of Regents policies, lecturers are compensated based on credit hours and not on teaching equivalencies. The result is that lecturers teaching contact hour classes are paid relatively less than regular faculty for those classes. This creates both a difficulty with recruitment and significant inequity in compensation for identical instruction. Converting to a teaching equivalency model would constitute a significant cost to the colleges.
- ii. The policy applies only to the academic year and does not address the issues of teaching faculty workload beyond the academic year for those faculty members on an 11-month appointment.

ATTACHMENT C
DIVISION/DEPARTMENT CHAIR

The Division/Department Chair is an official position providing quasi-administrative oversight to the departments or divisions as designated on the various campus organizational charts. Division/Department Chair shall be on 11-month appointment, where appropriate to the duties and responsibilities of the assignment. Workload equivalencies provided to the Division/Department Chair are determined on a number of factors, including the number of personnel in the department, the number of programs administered, the number of course sections offered, the size of the departmental budget, and the complexity of the assignment.

Additional compensation for Division/Department Chairs shall not be less than \$300 per month. The size, complexity, and the nature of functions being performed shall determine the specific amount of the monthly stipend.

GUIDELINES:

1. Recommendations for teaching equivalencies and stipends should be established at the time of appointment by the Chancellor.
2. Appointments are to be effective August 1, unless otherwise approved by the Chancellor.

GENERAL DESCRIPTION OF DIVISION/DEPARTMENT CHAIRS:

DUTIES AND RESPONSIBILITIES FOR INSTRUCTION/ACADEMIC SUPPORT

1. Personnel
 - a. Evaluate faculty members for, promotion, tenure, contract renewal, and reappointments.
 - b. Assist in the appointment of lecturers, instructors, and other staff.
 - c. Provide recommendations for leaves of absence, e.g., sick, vacation, sabbatical, study, and leaves without pay; approve and process travel requests; and
 - d. Supervise clerical support, APT positions, and student-help workers as required by the division or the department.
2. Budget
 - a. Assist in establishing campus budget priorities as well as participate in and assist in preparing budget requests.
 - b. Facilitate discussion, prepare, and present division/department budget requests for equipment, student help and supplies.
 - c. Assist and monitor division/departmental expenditures.
 - d. Maintain the division/department inventory of equipment.

3. Curriculum and Instruction
 - a. Assess program outcomes data, and assist in the preparation of reports.
 - b. Coordinate annual program reviews.
 - c. Coordinate the preparation of division/department instructional scheduling, considering faculty workload.
 - d. Plan and suggest updates to the division/department curriculum, courses, and programs.
 - e. Coordinate and update division or department section of the campus catalog of courses.
 - f. Aid in improvement of teaching and supervision of instruction.
4. Staff Development
 - a. Provide orientation and support for new lecturers, faculty, and staff to supplement campus efforts.
 - b. Encourage the development of each faculty member's special talents and interests within the context of the institution's needs and priorities.
5. Student Services
 - a. Facilitate resolution of student academic grievances.
 - b. Assist in and/or coordinate the division/department role in student advising and recruitment.
 - c. Facilitate student evaluations of instruction.
6. Division/Department Governance
 - a. Serve as communication link, keeping division/department members informed of general campus activities and representing the division/department views to administration.
 - b. Assist in and/or identify and resolve division/departmental concerns.
 - c. Assist in and/or establish and maintain positive work relationships among faculty, staff and administrators within campus structure.
7. Continuing Education and Training
 - a. Provide assistance to the Director of Continuing Education and Training in the development of community service programs and courses, as needed.

**GUIDE TO DETERMINE MIMIMUM TEACHING LOAD FOR
DIVISION/DEPARTMENT CHAIRS**

Criteria	Levels			
	4 pts	3 pts	2 pts	1 pts
a) Number of course sections (annual)	400+	200-399	125-200	<125
b) Number of programs	6+	4-5	2-3	1
c) Total number of employees	75	50-74	20-49	<20
d) Budget	\$75K+	\$50-74K	\$20-49K	<\$20K
e) Additional complexity (weighted double): scheduling, assessment, budget preparation, multi-disciplines, accreditation, multiple sites, clinical, commercial enterprise, grants, campus operations, advisory committees, fundraising, facilities, select admissions	Complex	Moderately Complex	Moderately low	Low

How to determine number of programs:

- 1) Any program requiring a separate program review
- 2) Within the Liberal Arts each of the of the following is defined as a program:
Humanities, Social Sciences, Math/Science, LLL

Benchmarks:

Total Points	Teaching Equivalencies/academic year
19+	21 SCH teaching equivalencies/yr
15-18	15 SCH teaching equivalencies/yr
11-14	9 SCH teaching equivalencies/yr
<11	6 SCH teaching equivalencies/yr

ATTACHMENT D PROGRAM COORDINATORS

A Program Coordinator has responsibility for managing various aspects of a program or its equivalent. Programs include all associate degree programs (unless the program is managed by the Division/Department Chair) and those special areas of emphasis within the non-degree programs as designated by the campus. Programs may also include major support activities or program initiatives such as service learning or freshman year experience which are not assigned as regular duties to a faculty member.

The duties of the Program Coordinator may include assessment of program outcomes, program review, development and maintenance of relationships with business and industry, liaison with program accreditation or other external certification organizations, maintenance of laboratory facilities, shops and equipment, and overall coordination of the students, curriculum, and personnel associated with the program. For all designated campus programs, the amount of teaching equivalencies provided to the Program Coordinator is based on the specific duties assigned to the coordinator and the size and scope of the program. Program Coordinators are not the same as those who serve as Division/Department Chairs, even though they may assist in carrying out some of the duties of Division/Department Chairs.

Each campus shall determine the number of teaching equivalencies to be granted within a range not less than 3 SCH to 12 SCH equivalencies per academic year.

ATTACHMENT E DISCIPLINE COORDINATOR

A Discipline Coordinator has responsibility for overall coordination of courses within the discipline, e.g., facilitating communication between and among discipline faculty, scheduling classes, selecting textbooks, assisting with transcript evaluations, updating and developing course curriculum, maintaining laboratory facilities, shops and equipment, and overall coordination of the students, and personnel associated with the discipline to include the recruitment and mentoring of lecturers. The amount of teaching equivalencies provided to the Discipline Coordinator is based on the specific duties assigned to the coordinator.

Each campus shall determine the number of teaching equivalencies to be granted within a range not less than 1 SCH to 6 SCH per academic year.

ATTACHMENT F
FACULTY GOVERNANCE LEADERSHIP

Faculty members elected to academic governance positions within the campus Faculty Senate have the responsibility to carry out the duties of reviewing, assessing, recommending, and acting on issues academic policy established by the Board of Regents pertaining to the mission of their respective campuses. Not all members of the Faculty Senate or related governance organizations are granted teaching equivalencies. Each campus shall determine the number of SCH equivalencies to be granted within the following ranges;

- I. Faculty Senate Leadership, from 6 to 12 SCH per academic year
- II. Curriculum Committee Leadership, from 4 to 12 SCH per academic year

The allocation of the SCH equivalencies within the Faculty Governance Leadership shall be left to the individual campus senates.

ATTACHMENT G OTHER SCH EQUIVALENCIES

There are other relevant activities for which teaching equivalencies may be granted, either at the initiative of the campus administration or a faculty member. These equivalencies shall depend on the scope of the activity.

Such activities include, but are not limited to:

- a. Management of labs and shops
- b. Major curriculum revision
- c. Research and development in teaching pedagogy
- d. Development of major grant or contract proposals
- e. Institutional service
- f. Providing expert technical assistance to federal, state, county, and other agencies that serve the public and benefit the college.
- g. Accreditation
